### Extract the signal from the noise

- Information is not knowledge.
- Knowledge is used to determine meaning
- Knowledge is applied when interpreting information

Shally Steckerl. <http://www.slideshare.net/beeshields/information-overload-506995>

### Measure the quality of the info

- 1) Make a list of sources
- 2) Percent of last 10 posts you found useful
- 3) Eliminate the bottom 50%
- 4) Also consider
  - a) Posting length (look for short and sweet)
  - b) Posting rate (not too frequent)
  - c) Stay away from the re-posters

Shally Steckerl. <http://www.slideshare.net/beeshields/information-overload-506995>

### Information Triage: Keep or Delete

- Data can be like clutter in your closet
- Computer based info may only have a short shelf-life
- Ask yourself if it will mean anything in a year
  - If the answer is no, then just delete it
  - If yes, then save it in a simple archive folder
  - You can find it later using a desktop search tool

Shally Steckerl. <http://www.slideshare.net/beeshields/information-overload-506995>

### Sports Wrap-up

1. Bobby Thompson homerun
2. Billy Mills wins 10,000m at Tokyo Olympics
